

MARK CYRIL TUBERA

SOFTWARE ENGINEER | API INTEGRATION SPECIALIST

Tubao, La Union 2509 | jobs.markcyriltubera@gmail.com | +63 962 524 6119
github.com/thembrk | thembrk.github.io | linkedin.com/in/mark-cyril-tubera

Software Engineer with 3+ years building enterprise-grade REST/SOAP APIs and cloud integrations for enterprise clients. Oracle integration specialist skilled in designing scalable APIs, automating workflows, and optimizing system performance. Career Service Professional-eligible (2026), currently deepening backend and cloud-integration expertise through professional certifications while pursuing full-time roles.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, PHP
Frameworks & Libraries: Django, GeoDjango, Laravel, Vue.js, Leaflet.js
API Technologies: RESTful APIs, SOAP APIs, OAuth 2.0, API Design & Architecture
Databases: MySQL, PostgreSQL, Spatialite, SQL, Supabase
Integration & Cloud: Oracle Integration Cloud (OIC), Oracle VBCS, GeoPy, IBM Watson NLU
Dev Tools: HTML5, CSS3, Git, Docker, CI/CD, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Engineer | Accenture, Inc., Taguig, Philippines **Jun 2021 – Jun 2024**

API Development & Integration

- Built and maintained 100+ production REST and SOAP APIs for enterprise clients, enabling secure data exchange across distributed systems
- Partnered with cross-functional teams across 5 client engagements to architect integration solutions aligned with business objectives and risk-management frameworks
- Implemented API security including OAuth 2.0 across production endpoints
- Mentored a junior developer and an on-the-job trainee on API integration practices and coding standards

Automation & Performance

- Engineered a custom log-analysis tool that automated end-of-day log review, saving ~30 minutes of manual work daily and reducing the task to a single-person, self-service workflow
- Implemented caching and query optimization on high-traffic API endpoints to improve response times and throughput

Documentation & Knowledge Management

- Authored API specifications, integration guides, and runbooks that enabled knowledge transfer across multiple project teams
- Established team documentation standards for API and integration deliverables

Key Achievement — Performance Monitoring Solution

- Built an enterprise web application with Oracle Visual Builder Cloud Service (VBCS) and REST APIs that reports average integration execution times in real time
- Deployed across 3 client projects, tracking 1,000+ integration workflows and enabling the team to identify and prioritize slow-running integrations
- Surfaced performance bottlenecks proactively, supporting improvements in system reliability

PROJECTS

Job Tracker API | Laravel, IBM Watson NLU, PostgreSQL, Supabase | 2026

- Built a Laravel 13 REST API that tracks job applications through a status pipeline (Saved → Applied → Interview → Offer → Rejected) backed by PostgreSQL on Supabase
- Integrated IBM Watson Natural Language Understanding to extract skills and keywords from job descriptions with sentiment analysis and category classification
- Implemented resume-job match scoring by parsing uploaded PDF resumes and comparing extracted skills via a custom exact/partial matching algorithm (0–100% score)
- Designed and consumed 6 REST API endpoints with full CRUD functionality; GitHub: github.com/thembrk/job-tracker-api

Liquefaction WebGIS | GeoDjango, Leaflet.js, Spatialite, Python | 2020

- Developed a web-based GIS (BS Computer Engineering thesis) that assesses soil liquefaction risk for any address in the Cordillera Administrative Region
- Integrated PHIVOLCS HazardHunterPH REST API with a local Spatialite database to render real-time liquefaction susceptibility overlays on an interactive Leaflet.js map
- Built with GeoDjango and GeoPy for geospatial processing and geocoding; deployed as a live demo at thembrk.github.io

EDUCATION

Bachelor of Science in Computer Engineering

University of the Cordilleras | Graduated August 2020

CERTIFICATIONS & ELIGIBILITY

Oracle Cloud Platform Application Integration 2022 Certified Professional — Oracle (Issued Oct 2022)

Career Service Professional Eligibility — Rating: 88.46 | May 2026

Introduction to HTML, CSS, & JavaScript — IBM (Coursera), Jul 2026

Introduction to Software Testing — University of Minnesota (Coursera), Jul 2026

Programming for Everybody (Getting Started with Python) — University of Michigan (Coursera), Jul 2026

Databases and SQL for Data Science with Python — IBM (Coursera), Jun 2026

Technical Support Fundamentals — Google (Coursera), Jun 2026
